

Benedikt Franke

DevOps Engineer, Web Developer

benedikt@franke.tech +49 174 1999723

I like to bring order to chaos. Structuring data, writing clean code and optimizing processes - I produce great results and learn along the way.

Skills

DevOps

Streamlining development processes and continuously delivering software through automation and containerization.

Web Development

Proficient in designing and creating modern web applications that are both reliable and highly scalable.

Project Direction

Able to engineer and manage projects independently or in a team and get things done the right way.

Technical

Docker	Kubernetes	Linux
Git	Infrastructure as code	CI/CD
TypeScript	PHP	SQL
GraphQL	HTML	CSS

Work

MLL Münchner Leukämielabor 01/2018-Current

Software Developer

I am responsible for developing and modernizing the internal IT infrastructure and application landscape. My focus is to design and build modern web applications. I closely collaborate with users and plan, develop and maintain the system. By automating tests, configuration, and deployment, I ensure quality and increase development velocity.

twofour digitale Agentur GmbH 01/2017-12/2017

Web Developer

I started an internship at twofour as part of my studies and was later employed full time. My Tasks were centered around PHP based CMS and shop frameworks. Through test-driven development in agile Scrum teams we rapidly delivered challenging software solutions to our customers. My responsibilities included project setup, backend and frontend development and optimization of our deployment pipeline.

Freudenberg Sealing Technologies 06/2016-07/2016

Freelance Web Developer

Together with two colleagues we developed a web application to automate the food ordering system of the company's cafeteria. After assessing the requirements of the project, I planned and set up the database and configured the application server. I automated the process of exporting the collected data and sending it to the catering provider.

Media Markt 03/2013-02/2014

Computer Salesman

My areas of work included advising customers, providing technical service and placement of goods in the store. I was able to gather valuable experience through constant exposure to computers and refined my communication skills.

Education

FH Kufstein - Web Business & Technology 09/2014-07/2017

Bachelor of Science in Engineering graduated "with excellent success"

This bachelor program deals with the basics of technological and economical knowledge required to design and create web-based information systems. The focus is set on imparting a fully qualified understanding of web-based business models, applications and web technologies. I learned principles of

databases, programming and software engineering, and applied them in two web application projects for the Kufstein based Freudenberg GmbH.

University of Regensburg 10/2012-02/2013

General Chemistry, no graduation

Annette-Kolb-Gymnasium Traunstein 09/2004-06/2012

High School, Final Grade: 2.2

Languages

German Native speaker

English Fluent in written and spoken

Spanish Basic knowledge
