Profile

I like to bring order to chaos. Structuring data, writing clean code and optimizing processes - I produce great results and learn along the way.

Skills

DevOps

Streamlining development processes and continuously delivering software through automation and containerization.

Web Development

Proficient in designing and creating modern web applications that are both reliable and highly scalable.

Project Direction

Able to engineer and manage projects independently or in a team and get things done the right way.

Technology

Docker

Kubernetes

Linux

Git

Infrastructure Automatisation

CI/CD

JavaScript

PHP

SQL

API Design

HTML

CSS

Languages

German

Native speaker

English

Fluent in written and spoken

Spanish

Basic knowledge

Work

MLL Münchner Leukämielabor

Software Developer

01/2018-Current

I am responsible for developing and modernizing the internal IT infrastructure and application landscape. My main focus is to architect the transformation of a legacy application towards a modern web application. I closely collaborate with users and plan, develop and maintain the system. By automating tests, configuration and deployment, i ensure quality and increase development velocity.

twofour digitale Agentur GmbH

Web Developer

01/2017-12/2017

I started an internship at twofour as part of my studies and was later employed full time. My Tasks were centered around PHP based CMS and shop frameworks. Through test-driven development in agile Scrum teams we rapidly delivered challenging software solutions to our customers. My responsibilities included project setup, backend and frontend development and optimization of our deployment pipeline.

Freudenberg Sealing Technologies

Freelance Web Developer

06/2016-07/2016

Together with two colleagues we developed a web application to automate the food ordering system of the companies cafeteria. After assessing the requirements of the project, i planned and set up the database and configured the application server. I automated the process of exporting the collected data and sending it to the catering provider.

Media Markt

Computer Salesman

03/2013-02/2014

My areas of work included advising customers, providing technical service and placement of goods in the store. I was able to gather valuable experience through constant exposure to computers and refined my communication skills.

Education

FH Kufstein - Web Business & Technology

*Bachelor of Science in Engineering
graduated "with excellent success"*

09/2014-07/2017

This bachelor program deals with the basics of technological and economical knowledge required to design and create web-based information systems. The focus is set on imparting a fully qualified understanding of web-based business models, applications and web technologies. I learned principles of databases, programming and software engineering, and applied them in two web application projects for the Kufstein based Freudenberg GmbH.

University of Regensburg

General Chemistry, no graduation

10/2012-02/2013

Annette-Kolb-Gymnasium Traunstein

High School, Final Grade: 2.2

09/2004-06/2012
